Weyerhaeuser

OUR CARBON RECORD:

4 tracks inspired by our working forests

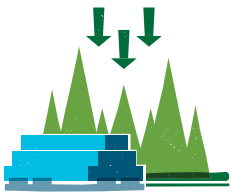

The *Carbon Record*, which reports our yearly carbon emissions, removals, storage and future goals, demonstrates our powerful contribution to mitigating climate change.

TRACK LIST

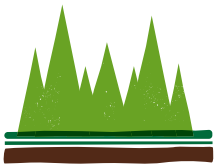

Track 1: Emissions

CO_2 released into the atmosphere by our direct operations and throughout our value chain: **10 million metric tons of CO_2 equivalent ($mtCO_2e$)**

Track 2: Removals

CO_2 removed from the atmosphere and stored within our forests and wood products: **31 million $mtCO_2e$**

Track 3: Storage

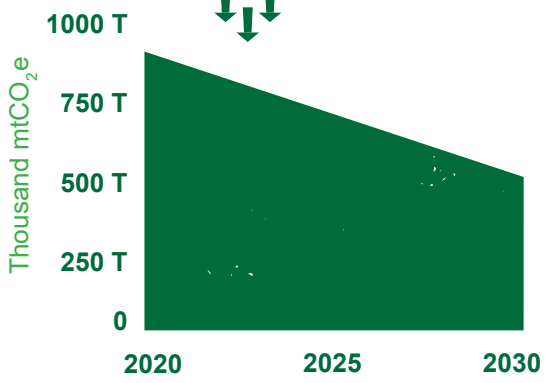

CO_2 stored in our forests (and kept out of the atmosphere) year after year: **2.3 – 3.6 billion $mtCO_2e$**

TRACK 4: EMISSIONS REDUCTION TARGET

We've set a target to reduce our greenhouse gas emissions by 2030.

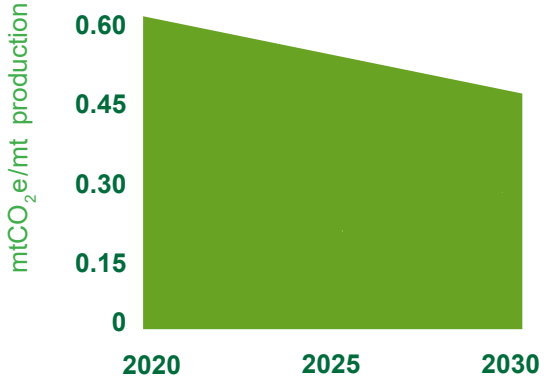

OUR 2030 GOAL

42% **Scope 1 & 2:**
Reduce by 42%

$mtCO_2e$ = metric tons of carbon dioxide equivalent

25% **Scope 3:**
Reduce by 25% per ton of production

Absolute emissions values include increased production forecasts

This target is in line with the Science Based Targets initiative's highest level of ambition: limiting global warming to 1.5°C.

WE ARE ON THE PATH TO NET-ZERO EMISSIONS BY 2050
